

## **Press Release – February 2018**

### **Logistics centre moves to modern new building**

By the end of 2017 most of the RÄDER-VOGEL logistics centre was moved to a new facility. The bringing together of all the sections resulted in much shorter distances and the use of three extra high-rack forklifts makes the logistics processes even more flexible. Over a surface area of 2900m<sup>2</sup> working areas for incoming goods, quality control, outgoing goods and packing have been carefully planned out. 600m<sup>2</sup> have been set aside for offices including social facilities for the staff.

The logistics processes have been optimized by the relocation leading to an improved level of service for the customers.

### **Rediscover the wheel**

All wheels have one thing in common: They are round.

However, each area of application has specific requirements in terms of size, materials and load capacity. RÄDER-VOGEL has been developing wheels and castors since 1946 that meet the ever-increasing demands of the market. From individual customer-specific items to standardised large batches. The high standards the Hamburg family business has set for itself, quality and capacity for innovation have made it one of the leading manufacturers of wheels, pallet rollers, press-on tyres and swivel and fixed castors worldwide. For use in industrial trucks, materials handling, storage technology and in industry, these products are available globally by RÄDER-VOGEL. With more than 30,000 different articles made from 25 materials, a variety of machinery and equipment is driven. All distinguished by the leading factor: Perfection, right down to the finest detail.
