

## **Press Release – February 2018**

### **Everything for Aviation - Review of NAIS 2018**

Together with RÄDER-VOGELs long-standing trading partner Techno Koleso LLC, they presented their product portfolio for aviation technology at the National Aviation Infrastructure Show (NAIS) in Moscow on February 7 and 8, 2018.

The focus was on the wheels and castors for ground support equipment. With their diverse range of tread materials, RÄDER-VOGEL offer a portfolio that can cope with a wide variety of climatic conditions and ensures that everything stays in motion at the airport. Whether in aircraft loaders or special vehicles for the maintenance sector, the wheels and castors have proven themselves with a long service life due to low wear and tear, even on rough surfaces.

### **Rediscover the wheel**

All wheels have one thing in common: They are round.

However, each area of application has specific requirements in terms of size, materials and load capacity. RÄDER-VOGEL has been developing wheels and castors since 1946 that meet the ever-increasing demands of the market. From individual customer-specific items to standardised large batches. The high standards the Hamburg family business has set for itself, quality and capacity for innovation have made it one of the leading manufacturers of wheels, pallet rollers, press-on tyres and swivel and fixed castors worldwide. For use in industrial trucks, materials handling, storage technology and in industry, these products are available globally by RÄDER-VOGEL. With more than 30,000 different articles made from 25 materials, a variety of machinery and equipment is driven. All distinguished by the leading factor: Perfection, right down to the finest detail.
