

## **Press Release – March 2018**

### **Everything for intralogistics - Review of LogiMAT 2018**

The LogiMAT fair was held in Stuttgart from the 13th to 15th of March 2018. Present as usual RÄDER-VOGEL. Over a total area of 65m<sup>2</sup> RÄDER-VOGEL presented a special range of products for intralogistics.

The international trade fair for intralogistics solutions and process management is rapidly gaining importance and drawing an ever increasing number of international visitors. A good reason to be present and show a selection of their products which include over 30,000 articles in the meantime. Along with solutions for materials handling and wheels and castors for heavy duty applications, RÄDER-VOGEL also presented an assortment of custom made products for a diverse range of industries as well as an extensive portfolio of 25 wheel tread materials. Particularly including both of the special materials VULKOLLAN® ELF and VULKOLLAN® Quartz developed inhouse.

VULKOLLAN® ELF is especially for use in areas endangered by fire and explosions or areas with heavily charged air or with extreme concentrations of dust particles. It also prevents electrostatic buildup.

VULKOLLAN® Quartz is suitable for use on extremely wet, slippery and greasy surfaces, due to the addition of quartz sand in the material. The result being a considerable improvement in traction, high braking performance and reducing the risk of slipping.

### **Rediscover the wheel**

All wheels have one thing in common: They are round.

However, each area of application has specific requirements in terms of size, materials and load capacity. RÄDER-VOGEL has been developing wheels and castors since 1946 that meet the ever-increasing demands of the market. From individual customer-specific items to standardised large batches. The high standards the Hamburg family business has set for itself, quality and capacity for innovation have made it one of the leading manufacturers of wheels, pallet rollers, press-on tyres and swivel and fixed castors worldwide. For use in industrial trucks, materials handling, storage technology and in industry, these products are available globally by RÄDER-VOGEL. With more than 30,000 different articles made from 25

materials, a variety of machinery and equipment is driven. All distinguished by the leading factor: Perfection, right down to the finest detail.
